SUMMARY

Hi there. I'm Josh, a full-stack developer with design sense. Motivated by the warm and fuzzies I get from quality work, my main focus so far has been React & PostgreSQL, but I play well with other tech. I also bring a lot of relevant skills to the table from my previous career as a licensed architect—among others, eager problem solving, team communication, attention to detail, a passion for learning, every...single...day.

RECENT PROJECTS

v•able - [GitHub](#) | vable.dev

PostgreSQL | Express | React | Node

Connects experienced volunteers with non-profit organizations that have a specific need for skilled labor.

npmmm - [GitHub](#) | npmmm.dev

PostgreSQL | Express | React | Node | Redux

Saves and organizes users' most-used npm (node.js) packages. Imports & exports packages from a project using the companion CLI tool.

PubCrawlHub - [GitHub](#) | pubcrawlhub.dev

jQuery | JavaScript | HTML5 | CSS3

Find bars and plan out a pub crawl using a sortable list of results and get map directions from one location to the next.
